

MARKET CONTRACTOR Are entirely removed by P.P.P.

Aberdeen, Brown County, O. Capt. J. D. Johnston. To all whom it may concern: I hereby testify to the wonderful properties of P. P. P. for eruptions of the skin. I reflected for several years with an unsightly and disagrocable eruption on my face. I tried every known remedy but in vain, until P. P. P. was used, and am now entirely cured.

(Bigned by) J. D. JOHNSTON, Bavannah, Ga.

Skin Cancer Cured.

Testimony from the Mayor of Sequin, Tex. Brown, Tex., January 14, 1893.

Mrssrs. Lippman Bros., favannah,
Ga.; Gentlemen-I have tried your P.
P. P. for a disease of the skin, usually
known as skin cancer, of thirty years'
standing, and found great relief; it
purifies the blood and removes all farritation from the seat of the disease
and prevents any spreading of the
sores. I have taken five or six bottles
and feel confident that another course
will effect a cure. It has also relieved
me from indigestion and stomach
troubles. Yours truly,

OAPT. W. M. RUST.

KEV. DR. TALMAGE.

THE NOTED DIVINE'S SUNDAY DISCOURSE.

Subject : "The All Seeing."

Text: "He that formed the eye, shall He not see?"—Psalm zelv., 9. The imperial organ of the human system is the eye. All up and down the Bible God honors it, extols it, illustrates it or arraigns it. Five hundred and thirty-four times it is mentioned in the Bible. Omnipresence—"the eyes of the Lord are in every place." Divine care—"as the apple of the eye." The clouds—"the eyelids of the morning." Irreverence—"the eye that morbith at its reverence—"the eye that mocketh at its father." Pride—"Oh, how lofty are their eyes!" Inattention—"the fool's eye in the ends of the earth." Divine inspection—"wheels full of eyes." Suddenness—"in the twinkling of an eye at the last trump." Olivelic sermon-"the light of the body is the eye," This morning's text: "He that formed the eye, shall He not see?" The surgeons, the doctors, the anatomists and the physiologists understand much of the glories of the two great lights of the human face, but the vast multitudes go on from oradle to grave without any appreciation of the two great masterpieces of the Lord God Almighty. It God had lacked anything of infinite wisdom, He would have failed in creating the human oye. We wander through the earth trying to see wonderful sights, but the most wonderful sight had recovered to see derful sight that we ever see is not so wonderful as the instruments through which we

It has been a strange thing to me for forty years that some scientist with enough eloquence and magnetism did not go through the country with illustrated lectures on canvas thirty feet square to startle and thrill and overwhelm Christendom with the marvels of the human eye. We want the eye taken from all its technicalities, and some one who shall lay aside all talk about the pterygomaxillary fissures, and the sclerotica, and the chiasma of the optic nerve, and in common parlance which you find I and everybody can understand present the subject. We have learned men who have been telling us what our origin is and what we were. Oh, if some one should come forth from the dissecting table and from the classroom of the university and take platform, and asking the help of the Creator, demonstrate the wonders Bi What

If I refer to the physiological facts suggested by the former part of my text it is only to bring out in a plainer way the theological lessons at the latter part of my text, "He that formed the eye, shall He not see?" I suppose my text referred to the human eye, since it excels all others in structure and in adaptation. The eyes of fish and reptiles and moles and bats are very simple things, because they have not much to do. There are insects with 100 eyes, but the 100 eyes have less faculty than the buman eyes. The black beetle swimming the summer pond has two eyes under water and two eyes above the water, but the four insectile are not equal to the two human. Man, placed at the head of all living creatures, must have ne equipment; while the blind fish in the Maramoth Cave of Kentucky have only an undeveloped organ of sight, an apology for the eye, which, if through some crevice of the mountain they should get into the sun'ight, might be developed into positive eyesight. In the first chapter of Genesis we find that God, without any consultation, created the light, created the trees, created the fish, created the fowl, but when he was about to make man he called a convention of divinity, as though to imply that all the powers of Godhead were to be enlisted in the achievement. "Let us make man." Put a whole ton of emphasis on that word "us." "Let us make man." And if God called a called a convention of divinity to create man I think the two great questions in that con-ference were how to create a soul and how to make an appropriate window for that em-

peror to look out of. See how God honored the eye before He created it. He cried, until chaos was irradiated with the utterance, "Let there be light!" In other words, before He introduced man into this temple of the world He illuminate lit, prepared it for the eyesight.
And so, after the last human eye has been destroyed in the final demolition of the world, stars are to fall, and the sun is to cease its shining, and the moon is to turn into blood. In other words, after the hu-man eyes are no more to be profited by their shining, the chandeliers of heaven are to be furned out. God, to educate and to bless and to help the human eye, set in the mantel of heaven two lamps—a gold lamp and a silver lamp—the one for the day and the other for the night. To show how God honors are the lamp and the other two lamps—as help the lamb are two lamps—as the lamb are two lamps—the lamp and the other for the night. ors the eye, look at the two halls built for the residence of the eyes, seven bones making the wall for each eye, the seven bones curiously wrought together. Kingly palace of ivory is considered rich, but the halls for the residence of the human eye are richer by so much as human bone is more sacred than elephantine tusk. See how God honored the eyes when He made a root for them, so that the sweat of toil should not smart them and the rain dashing against the forehead should not drip into them. The eyebrows not bending over the eye, but reaching to the right and to the left, so that the rain and the sweat should be compelled to drop upon the cheek, instead of falling into this divinely protected human eyesight. See how God honored the eye in the fact presented by anatomists and physiologists that there are 800 contrivances in every eye. For window shutters, the cyclids opening and closing 83, 00 times a day. The cyclashes so constructed that they have their selection as to what shall be admitted, saving to the dust. 'Stay out," and saying to the light, "Come For inside curtains the iris, or pupil of the eye, according as the light is greater or less, contracting or dilating. The eye of the owl is blind in the day-

time, the eyes of some creatures are blind at night, but the human eye so marvelously constructed can see both by day and by night. Many of the other creatures of God can move the eye only from side to side, but the human eye so marvelously con-structed has one muscle to lift the eye, and another muscle to lower the eye, and another muscle to roll it to the right, and another muscle to roll it to the left, and another muscle passing through a pulley to turn it round and round—an elaborate gearing of six muscles as perfect as God could make them. There also is the retina. gathering the rays of light and passing the visual impression along the optic nerve, about the thickness of the lampwick-passing the visual impression on to the senorism and on into the soul. What a delicate lens, what an exquisite screen, what soft cushions, what wonderful chemistry of the human eye! The eye, washed by a slow stream of moisture whether we sleep or wake, rolling imperceptibly over the pebble of the eye and emptying into a bone of the nostril. A contrivance so wonderful that it can see the sun, 95,000,000 miles away, and the point of a pin. Telescope and microscope in the same contrivance. The astronomer swings and moves this way and that and adjusts and readjusts the telescope until he gets it to the right focus. The microscopist moves this way and that and adjusts and readjusts the its work, but the human eye, without a bouch, beholds the star and the smallest insect. The traveler among the Alps, with one

glance taking in Mont Blane and the face of his watch to see whether he has time to Oh, this wonderful camera obscura which you and I carry about with us, so to-day we can take in our friends, so from the ton of Mount Washington we can take in New England, so at night we can sweep into our vision the constellations from horizon to horizon. So delicate, so semi-infinite, and yet the light coming 95,000,000 of miles at the rate of 200,000 miles a second is obliged to halt at the gate of the eve, waiting for admission until the portcullis be lifted. Something hurled 95,000,000 of miles and strikidg an instrument which has not the agitation of even winking under the power of the stroke! There also is the merciful arrangement of the tear gland, by which the eye is washed, and from which rolls the tide which brings the relief that comes in tears when some bereavement or great loss strikes us. The tear not an augmentation of sorrow, but the breaking up of the arctic of frozen grief in the warm gulf stream of consolation. Incapacity to weep is madness or death. Thank God for the tear glands, an l that the crystal gates are so easily opened. Oh, the wonderful hydraulic apparatus of the human eye! Divinely constructed vis-ion! Two lighthouses at the harbor of the immortal soul, under the shining of which the world sails in and drops anchor! What an authem of praise to God is the human eye! The tongue is speechless and a clumsy instrument of expression as compared with tion, or kindle with enthusiasm, or expand

with devotion, or melt with sympathy, or stare with fright, or leer with villainy, or droop with sadness, or pale with envy, or fire with revenge, or twinkle with mirth, ot beam with love? It is tragedy and comedy and pastoral and lyrid in turn. Have you hot seen its uplifed brow of surprise, or its frown of wrath, or its contraction of pain? If the eve say one thing and the lips say ap-If the eye say one thing and the lips say another thing, you believe the eye rather than

The eyes of Archibald Alexander and Charles G. Finney were the mightlest part of their sermon. George Whitefield enthralled great assemblages with his eyes, though they were orippled with strabismus. Many a military chieftain has with a look hurled a regiment to victory or to death. Martin Luther turned his great eye on an assassin who came to take his life, and the villain fied. Under the glance of the human lain fied. Under the glance of the human eyethetiger, with five times a man's strength snarls back into the African jungle. But those best appreciate the value of the eye who have lost it. The Emperor Adrian by accident put out the eye of his servant, and he said to his servant: "What shall I pay you in, money or in lands? Anything you ask me. I am so sorry I put your eye out. But the servant refused to put any financial estimate on the value of the eye, and when the Emperor urged and urged again the mat-ter he said, "Oh. Emperor, I want nothing but my lost eye!" Alas for those for whom a thick and impenetrable veil is drawn across the face of the heavens and the face of one's own kindred. That was a pathetic scene when a blind man lighted a forch at night and was found passing along the highway, and some one said, "Why do you carry that torch, when you can't see?" "Ah," said he, "I can't see, but I carry this torch that others may see me and pity my helplessness, and not run me down." Samson, the giant, with his eyes put out by the Philistines, is more helpless than the smallest dwarf with vision undamage. All the sympathies of Christ were stirred when He saw Bartimeus with darkened retina, and the only salve He ever made that we read of was a mixture of dust and saliva and a prayer, with which He cured the eyes of a man blind from his nativity. The value of the eye is shown as much by its catastrephe as by its healthful action. Ask the man who for twenty years has not seen the sun rise. Ask the man who for half a century has not seen the face of a friend. Ask in the hospital the victim of ophthalmia. Ask the man whose eyesight perished in a powder blast. Ask the Bartimens who never met a Christ or the man born blind who is to die

blind. Ask him. This morning, in my imperfect way, I have only hinted at the splendors, the glories, the wonders, the divine revelations, the spocalypses of the human eye, and I stagger back from the awful portals of the physiological miracle which must have taxed the ingenuity of a God, to cry out in your ears the words of my text, "He that formed the eye, shall He not see?" Shall Herschel not know as much as his telescope? Shall Frauchofer not know as much as his spectroscope? Shall Swammer lan not know as much as his microscope? Shall Dr. Hooke not know as much as his micrometer? Shall the thing formed know more than its mass ter?, "He that formed the eye; shall He not

We stand at the center of a vast circumfer-

ence of observation. No privacy. On us,

eyes of cherubim, eyes of seraphim, eyes of archangel, eyes of God. We may not be able to see the habitants of other worlds, but perhaps they may be able to see us. We have not optical instruments enough to desory them; perhaps they have optical instruments strong enough to descry us. The mole cannot see the eagle mid sky, but the eagle mid sky can see the mole mid grass. We are able to see mountains and caverus o another world, but perhaps the inhabitants of other worlds can see the towers of our cities, the flash of our seas, the marching of our processions, the white robes of our well dings, the black scarfs of our obsequies. It passes out from the guess into the posi-tive when we are told in the Bible that the inhabitants of other worlds do come as convoy to this: Are they not all ministering spirits sent forth to minister to those who shall be heirs of salvation? But human inspection, and angelic inspection, and stellar inspection, and lunar inspection, and solar inspection are tame compared with the thought of divine inspection. "You converted me twenty years ago," said a black man to my father. "How so?" said my father. "Twenty years ago," said the other, "in the old schoolhouse prayer meeting at Bound Brook you said in your prayer, 'Thou, God, seest me,' and I hat no peace under the eye of God until I became a Unristian." Hear it. "The eyes of the Lord are in every place." "His eyelids try the chil-dren of men." "His eyes were as a flame of fire," "I will guide thee with Mine eye." Oh, the eye of God, so full of pity, so full of power, so full of love, so full of indignation, so full of compassion, so full of mercy! How it peers through the darkness. How it outshines the day! How it glares upon the offender! How it beams on the penitent soui! Talk about the human eye as being indescribably wonderful! How much more wonderful the great, searching, overwhelming eye of God! All eternity past and all

eternity to come on that retina. The eyes with which we look into each other's face to-day suggest it. It stanks written twice on your face and twice on mine, unless through casualty one or both have been obliterated. "He that formed the eye, shall He not see?" On, the eye of Go! it sees our sorrows to assuage them, sees our perplexities to disentangie them, sees our wants to sympathize with them. It we fight Him back, the eye of an autagonist. If we ask His grace, the eye of an everlasting friend. You often flui in a book or manuscript a star calling your attention to a rootnote or explanation. That star the printer calls an asterisk. But all the stars of the night are asterisks calling your attention to God-an all observing God. Our every nerve a divine handwriting. Our every muscle a pulley divinely swung. Our every bone sculptured with divine suggestion. Our every eye a reflection of the divine eye. God above us, and God beneath us, and God before us, and God behind us, and God within

What a stupendous thing to live! What a stupendous thing to die! No such thing as

hidden trangression. A dramatic advocate

in olden times, at night in a courtroom, persuaded of the innocence of his client charged with murder and of the guilt of the witness who was trying to swear the poor man's life away-that advocate took up two bright lamps and thrust them close up to the face of the witness and cried, "May it please the court and gentlemen of the jury, behold the murderer!" and the man, practically under that awful glare, confessed that he was the criminal instead of the man arraigned at the bac. Oh. my friends, our most hidden sin is under a brighter light than that. It is under the burning eye of God. He is not a blind giant stumbling through the heavens. He is not a blind monarch feeling for the step of His chariot. Are you wronged? He sees it. Are you poor? He sees it. Have you domestic, perturbation of which the world knows nothing? He sees it. "Oh," you say, "my affairs are so insignificant I can't realize that God sees me and sees my affairs." Can you see the point of a pin? Can you see the eye of a needle? Can you see a mote in the sunbeam? And has God given you that power of minute observation and does He not possess it Himself? "He that formed the eye, shall He not see?" But you say: "God is in one world and I am in another world. He seems so far off from me I don't really think He sees what is going on in my life." Can you see the sun 95,000,00) miles away, and do you not think God has as prolonged vision? But you say, "There are phases of my life and there are colors-shades of color-in my annoyances and my vexations that I don't think God can understand." Does not God gather up all the colors and all the shades of color in the rainbow? And do you suppose there is any phase or any shade in your life He has not gathered up in His own heart? Besides that I want to tell you it will soon all be over, this struggle. That eye of yours, so exquisitely fashioned and strung, and hinged and roofed, will before long be closed in the last slumber. Loving hands will smooth down the silken fringes. So He giveth His beloved sleep. A legend of St. Frotobert is that his mother was blind, and he was so sorely pitiful for the misfortune that one day in sympathy he kissed her eyes, and by mira-cleshe saw everything. But it is not a legend when I tell you that all the blind eyes of the Christian dead under the kiss of the resurrection morn shall gloriously open. Oh, what a day that will be for those who went groping through this world under perpetual obscuration, or were dependent on the hand of a friend, or with an uncertain staff felt their way, and for the aged of dim sight about whom it may be said that "they which look out of the windows are darkened" when eternal daybreak comes in! What a beautiful epitaph that was for a tombstone in a European cemetery: "Here reposes in God,

HORRIBLE FATE OF ENGLISH MIS-SIONARIES AT KUCHENG.

A List of the Unfortunates-England Aroused.

The London Telegraph prints a dispatch from Shanghai stating that the massacre at Kucheng occurred on July 31st. The officials suppressed the news for three days. The names of those killed are:

Misses Elsie Marshall, Annie Gordon, Bessie Newcomb and Flora Stewart, all of the English Zenana mission, Misses Nellie Saunders, Topsy Saunders, Rev. Dr. Stewart and Mrs. Stewart, of the Church Missionary society.

Five of Mr. and Mrs. Stewart's chillfen were killed and two survived. One had a knee broken and the other, baby, lost an eye. The following

were saved: Miss Hartford, of the American mission; Miss Coddington, of the English Zenana mission; Rev. H. S. Phillips, of the English Church Missionary

United States Consul Hixson, who is stationed at For Chow, with a party of volunteers; upon receipt of the news of the massacre, started on a steam launch for the scene and has returned bringing with him the wounded americans.

The experiences of the survivors were terrible. They say that death was the least part of the sufferings of the butchered women.

Indignation at London is intense, nevertheless the warships in the harbor are idle. A mass meeting has been arranged for to protest against the lack of energy on the part of the authorities and to urge that reparation be made and that the guilty persons be punished. The mandarins endeavored to blame certain secret societies for the outrage. Europeans, however, regard this as nonsense. The officials ate tenewing their old tactics of stopping telegrams.

The reports are rather mixed. The latest says that it is now known that ten persons were killed, including Miss Lena Stewart and Dr. Stewart's whole family except two. The American missionaries, Miss Hartford and Dr. Gregory, escaped, but the former was fearfully injured. Several English and American children were killed.

English Press Comment. The London Standard demands that the murderers be visited with condign punishment, and that an example be made of the officials who virtually connived at the massacre of the Christians. The paper says:

"If the emperor cannot or will not protect British residents we must give him assistance of the kind he will not welcome."

The Chronicle says it trusts that Great Britain and the United States will combine to teach the Chinese a lesson that will cause foreigners to berespected; but in view of the conditions existing in the country, the bodies sending missionaries there, especially women, incur the gravest responsibility and the whole question ought to be reconsidered.

The Times says: "The outrage must, of course, form the subject of strong representation to China from England, and probably from the United States also. It must not be passed over as a trifle. Immunity to the murderers would cause a standing menace to the lives and property of the whole European community in China."
